

STACKING RINGS WITH CRYSTAL CLAY, GLITTER ROXS AND NUNN DESIGN 2-PART RESIN

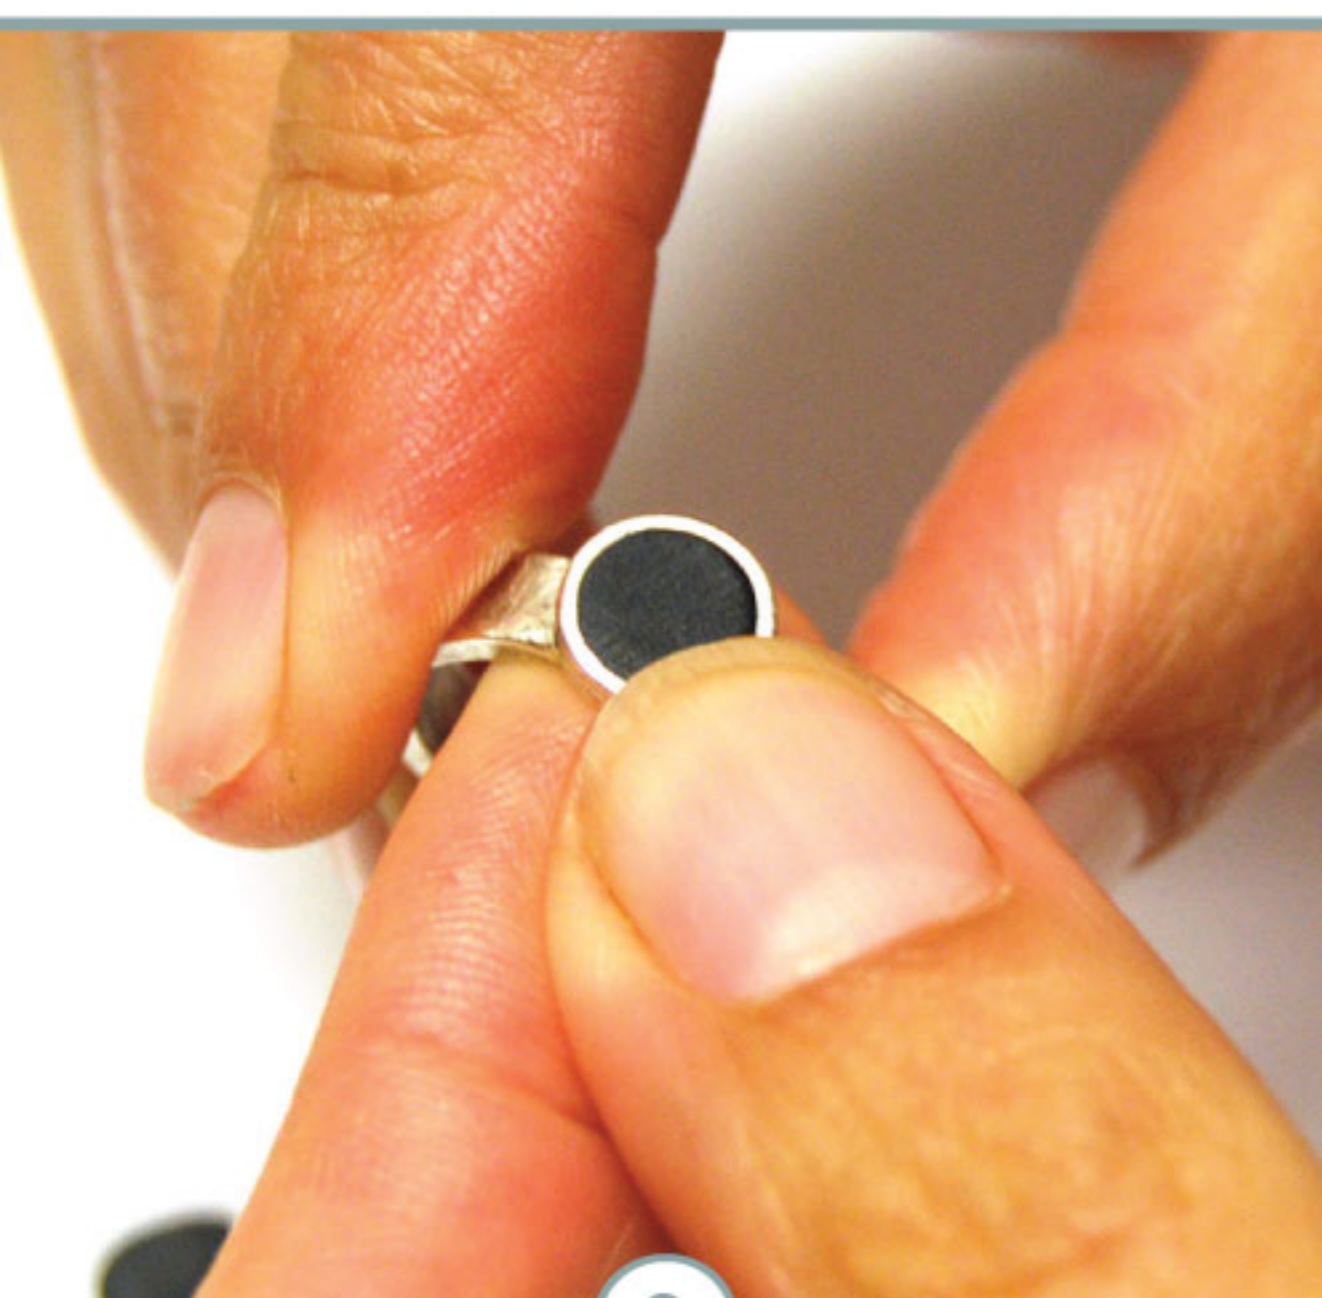

1

Mix up Crystal Clay: Pinch off equal sized balls Part A and Part B and blend together fully until the clay is no longer marbled.

2

Pinch off a lentil sized ball of Crystal Clay and roll in palm of your hands until smooth.

3

Place it into the Hammered Ring Itsy Circle and pat it down into the bezel creating a flat and even surface.

4

Use a wet-wipe to remove any Crystal Clay from the ring. When the clay hardens, it is like cement.

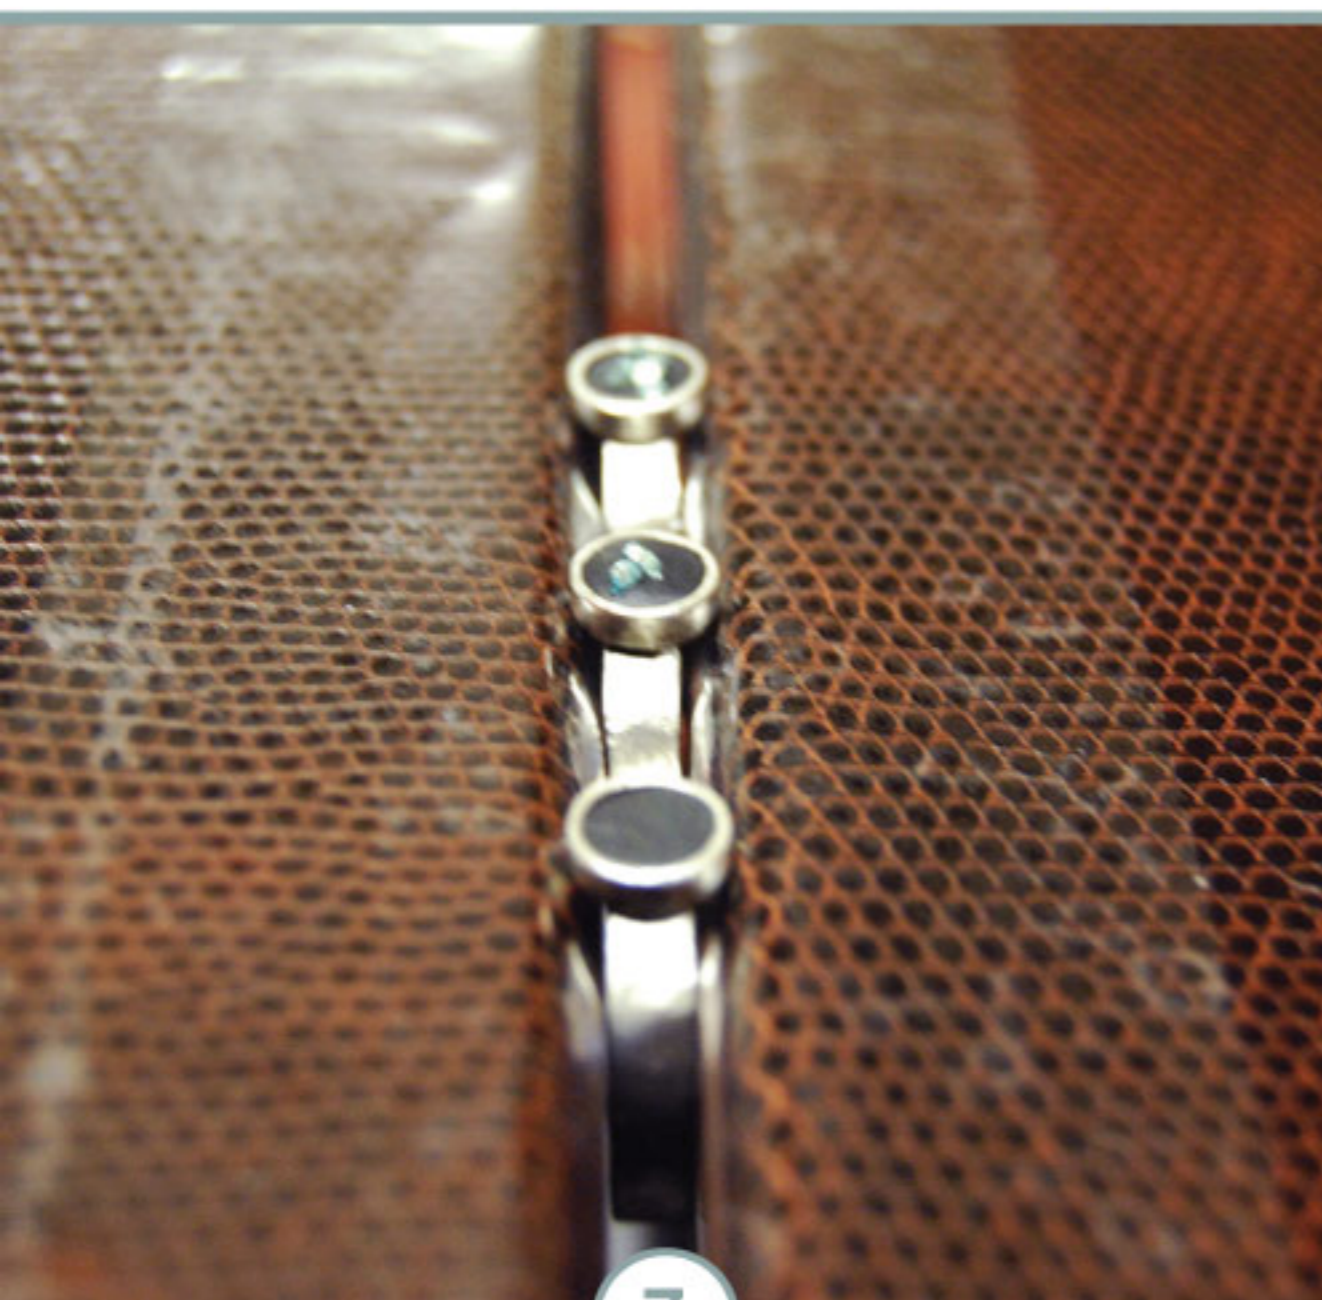

5

Place a couple Glitter Roxs flakes on the uncured Crystal Clay. Let the clay set for 2 hours or until hard.

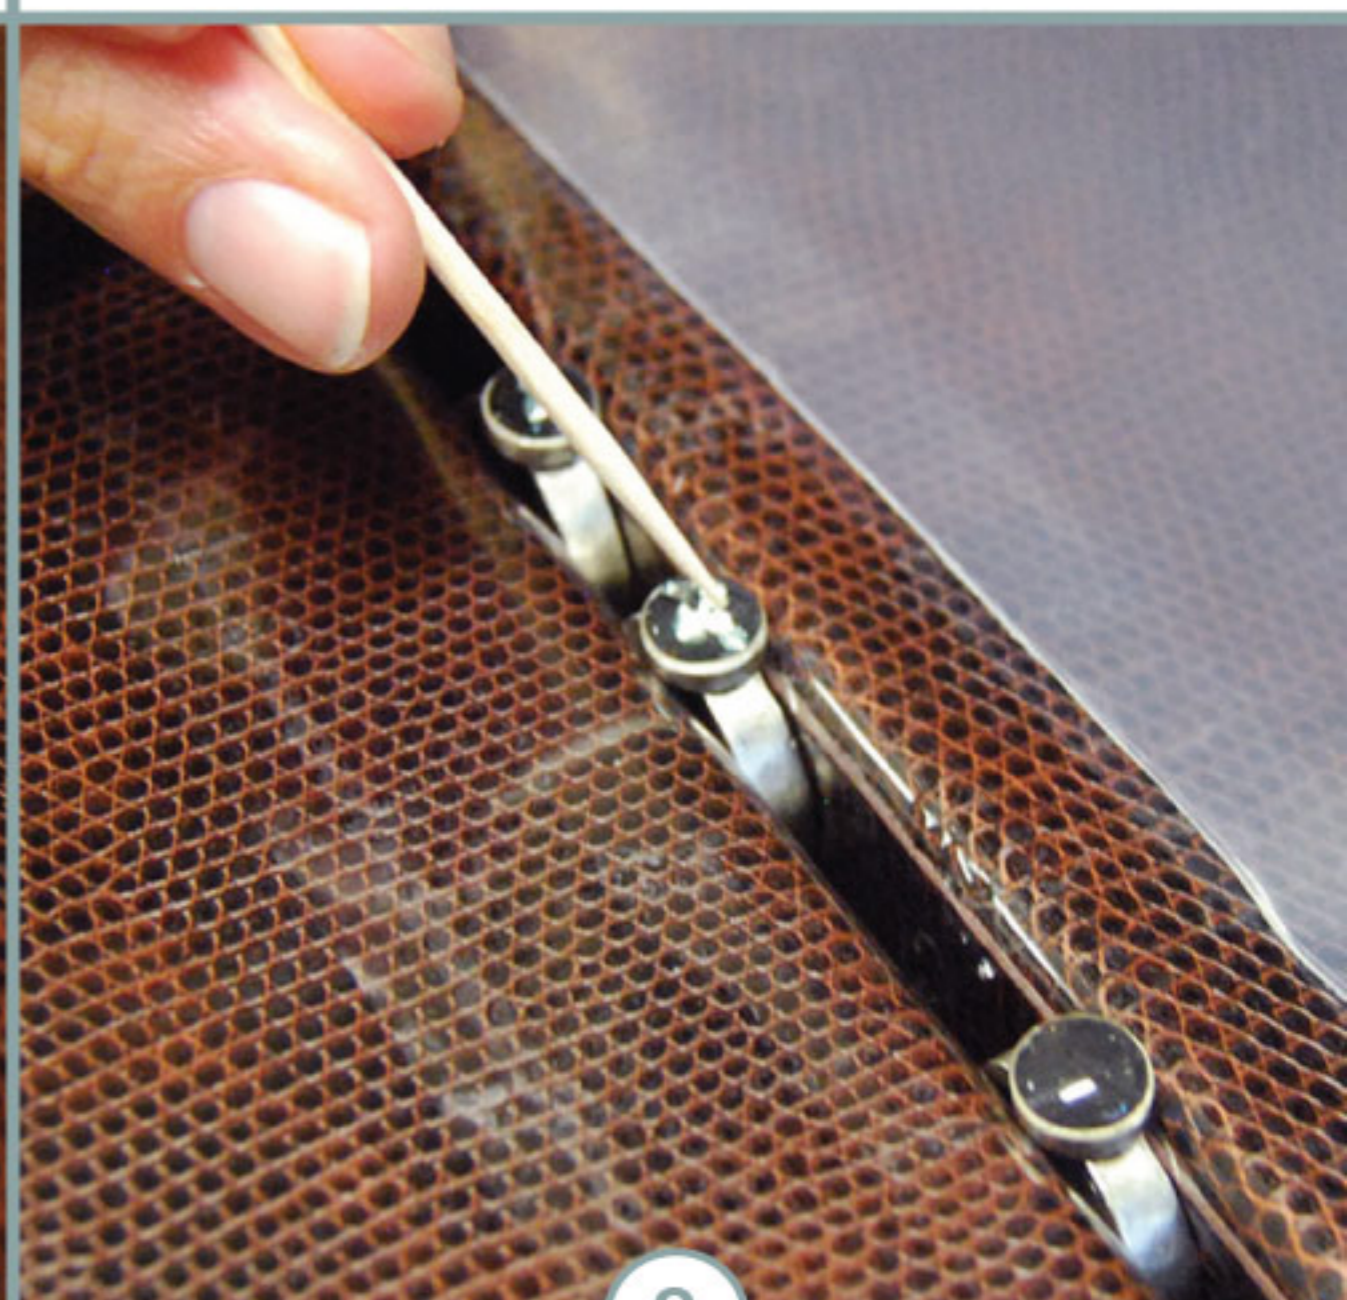

6

Pour equal parts of A, then B, of Nunn Design 2-Part Resin into cup, mix for 2 minutes and put under lamp for 5 min.

7

Place rings in between two surfaces to make level. You can use wooden blocks or stir sticks. Tape prevents resin from sticking.

8

Drizzle a wee bit of resin onto the surface to create a slight dome. Move around with toothpick. Let cure for up to 72 hours.
