

# NUNN DESIGN®

This handy cheat sheet allows you to see the colors that are possible by mixing the various Swellegant paints and patinas

## Swellegant Sampler

Nunn Design is excited to offer Swellegant! Metal Coating paint and Patinas!

We are offering 4 different Metal Coatings – you may use this to coat most any surface (polymer clay, metal, plaster, resin, wood, ceramic, epoxy clay and more!)

Once you have coated your piece, you may choose from three Patinas to add age, rust, verdigris dark antiquing – the possibilities are endless!

(Be sure to seal your piece with a quality sealant (like the Nunn Design® Sealant) to ensure a long lasting finish!)

Take a peek at the chart to the right to see the effect each coating and patina will provide.

All these coatings can be layered – as many times as you'd like – until you get the look your muse was waiting for!

		Gold Green Verdigris Patina	Darkening Patina	Tiffany Green Rust Patina
Raw				
Brass Metal Coating				
Bronze Metal Coating				
Copper Metal Coating				
Silver Metal Coating				

### SWELLEGANT! METAL COATING

Use these to coat most surfaces (polymer clay, metal, plaster, resin, wood, ceramic, and more!). Brass, Bronze, Copper and Silver.

### SWELLEGANT! PATINAS

Patinas to add age to your piece – rust, verdigris and dark antiquing.
